Made with GAMMA

KPIs give the business a quick health check

Four measures, one fast read on the business.

SUM OF AMOUNT

Sales Revenue

Total sales value generated by the business.

SUM OF QUANTITY

Demand Volume

Total number of products sold.

SUM OF PROFIT

Profit Earned

Profit earned by the business after sales.

SUM OF AOV

Average Order Value

Average value of one order.

Together, these four KPIs show overall business health — without needing to read every chart.

State filter turns one dashboard into a focused view

Changing the state slicer recalculates the connected visuals for the selected state.

01

Choose State

Select Bihar in the state slicer.

02

Recalculate

The dashboard updates the connected visuals.

03

Read Sales

Sum of Amount by State shows where the sales value comes from.

The Bihar view answers a focused question: what role does the selected state play in total sales contribution?

Category mix and monthly profit reveal the shape of demand

The mix shows where demand is concentrated; momentum shows when profit changes.

MIX

Sum of Quantity by Category

The donut chart shows which categories, such as Clothing or Electronics, have stronger demand.

Slicers update the distribution based on the selected filters.

MOMENTUM

Profit by Month

The column chart helps scan month-to-month profit movement and possible seasonality.

Read the trend in the context of the selected State and Quarter.

Customer and payment behavior show where to focus

Value comes from customer relationships; payment preferences signal possible friction.

CUSTOMER LANE

Sum of Amount by
CustomerName

Identifying top-value customers can help focus retention and repeat purchases.

PAYMENT LANE

Sum of Quantity by
PaymentMode

The usage pattern across methods such as COD, Debit Card, and UPI becomes clear.

Sub-category profit points to the next inventory move

Profit contribution first. Inventory action next.

01

Read contribution

Sum of Profit by Sub-Category highlights the most profitable areas.

02

Spot the signal

Compare sub-categories such as Printers, Bookcases, and Saree in the selected view.

03

Choose the move

Decide the stock, merchandising, or promotion focus based on the evidence.

The dashboard does not replace a decision—it makes the next inventory question more focused.

VISUAL READOUT

The dashboard makes patterns easy to scan

Clothing

Clothing is a key demand category.

Profit rhythm

Profit fluctuates from month to month.

COD trust

COD remains the most trusted payment method.

Customer value

Some customers make repeat high-value purchases.

Profit pockets

Printers and Bookcases generate high profit.

Exact view changes with State and Quarter filters.

From raw data to a decision-ready dashboard

Each layer makes the dashboard cleaner, more interactive, and more useful.

01

Power BI Desktop

Dashboard development and interaction layer.

02

Power Query

Data cleaning and preparation.

03

DAX

KPI calculations and measures.

04

Slicers

State and Quarter filters.

05

Visualization

Hierarchy, contrast, and readable chart choice.

FINAL TAKEAWAY

Sales, customers, and profit in one view.

This dashboard gives a complete view of sales, customer behavior, and profit.

How This Helps the Client

- Identify sales trends by state and time period.
- Understand profitable categories, customers, and payment preferences.
- Use filters to make faster, data-driven business decisions.
- Support future planning through an All India view and sales forecasting.
